

The solution to
move your
business forward

www.pbisol.com

WHO WE ARE

PBI Solutions provides custom CNC machining, fabrication, surfaces finishes, assembly and secondary services to our customers through our network of suppliers. Our highly qualified ISO 9001:2015 and AS9100D certified quality management system, ITAR registration machine shops can make any custom design, simple or complex.

We offer rapid prototypes, small-batch machining, and high-volume production of a range of sheet metal materials, including aluminum, copper, brass, steel, and stainless steel. It's like having an entire supply chain team for your project.
